Senior Software Engineer – Senior Frontend Engineer

Experienced frontend engineer with over 10 years of expertise in developing scalable, high-performance web applications using React, TypeScript, Node.js, CSS, and modern frontend technologies. Adept at creating responsive, accessible solutions that enhance user experiences and drive revenue growth. Proven track record in leading cross-functional teams, mentoring developers, and integrating innovative tools to optimize development workflows.

WORK EXPERIENCE

Senior Frontend Engineer
Roboboogie, Portland, OR
September 2015 – March 2024

- Led the end-to-end development of web applications from technical design through implementation and launch.
- Directed cross-functional teams to build high-impact, responsive, and accessible user experiences, adhering to WCAG standards.
- Managed projects for Fortune 500 clients by optimizing UI/UX and implementing scalable, maintainable architectures.
- Mentored junior, mid-level, and senior developers; conducted code reviews and facilitated knowledge sharing to strengthen team skills.
- Interacted directly with clients for support, sales, and troubleshooting, ensuring strong relationships and successful project outcomes.
- Developed and executed A/B and multivariate tests that improved user engagement and increased revenue (9–13% per checkout).
- Created an Optimizely X CLI tool (available on NPM and GitHub) that reduced test production time by 15–20%.
- Integrated both first- and third-party APIs to introduce innovative features for healthcare and e-commerce clients.
- Spearheaded performance optimizations and resolved technical debt while implementing new features.

Frontend Engineer
Thismoment Inc, San Francisco, CA
December 2013 – June 2015

- Co-led the frontend development team to deliver robust, reliable websites for Fortune 500 clients using JavaScript, PHP, CSS, and HTML.
- Served as Lead Developer on major projects, including Procter & Gamble's internal content tool and multiple ABC Discover microsites.
- Developed reusable, configurable, and responsive CMS components (e.g., Twitter feed and Video Gallery), integrating external APIs and building internal APIs to manage user configuration.
- Collaborated with product managers and client stakeholders to define technical requirements, timelines, and deliverables.
- Participated in technical interviews and hiring decisions, strengthening the engineering team's overall capabilities.
- Integrated third-party API services to expand website functionalities, including user contest submission features.

EDUCATION

Bachelor of Arts in English Education
California State University of Long Beach, Long Beach, CA, USA
GPA: 3.75

Associate of Arts in Computer Science
Community College of San Francisco, San Francisco, CA
GPA: 3.83

Fullstack Certificate in Ruby on Rails/JavaScript
Dev Bootcamp, San Francisco, CA, USA

PROJECTS

Optimizely X CLI Tool - Roboboogie

- Developed a command-line tool for rapid test production with Optimizely X, streamlining workflows and saving 15–20% in production time. View on NPM

Optimizely Event Tracker Chrome Extension - Roboboogie

- Created a Chrome extension to enhance event tracking and streamline analytics for client projects.
